Safety Advice

Attention

In some countries approval is needed to set up a marquee/tent larger than 75 m². It is your responsibility to comply with local rules and regulations and to ensure that the marquee/tent is assembled correctly.

In case of bad weather conditions, it is your responsibility to ensure the marquee/tent is safely secured and that the marquee/tent does not cause damage to others.

Do not use open fire, welding equipment or other sources which can ignite, inside or close to the tent.

The marquee/tent must be safely secured. We recommend you secure your marquee/tent with straps and pegs as soon as it is assembled.

Make sure to check if the marquee/tent is covered by your home contents insurance.

Marquees/tents must be evacuated under extreme weather conditions.

In the event of snow always remove snow from the roof of the marquee/tent regularly to prevent snow from building on the roof as heavy snow can cause the marquee/tent to collapse.

In the event of rain there is a risk of rain puddles building up on top of the roof of the marquee/tent. Heavy rain puddles can cause the roof to collapse. It is your responsibility to ensure rain puddles do not build up. As a precaution, make sure the roof of the marquee/tent is stretched out properly and adequately over the side frames of the marquee/tent and remove rain water regularly.

Please always check our website for the latest safety advice and manual.

8x12m Storage Tent

Description	ID Nummer		Quantity

8x12m Storage Tent

I
Select a flat ground for the tent, unpack the carton and check all the parts including tubes, tent and accessories... etc. are present as same as list.
Assemble the framework of rooftop by joining the portion (7.8.9.10.11.12.) together with poles (2.3). To ensure the screw fixed to every pole tightly.

II
Attach one end of supported pole (4.5) to the joints (8.11.9.12)

Fastening the roof by using turnbuckle set (25) which are diagonally across through each two sections as shown below.

8x12m Storage Tent

III

Attach 7 pcs legs (no.6) to raise the tent on one side, then the other 7 pcs legs (no.6) on the other side. And repeat this step to fix the other 14 pcs legs. Use steel wires to complete the structure like below. Fix the ground bar and pillars like shown on the picture below.

IV

You facilitate the assembly and dismantling by pulling the roof with ropes over the tent frame. Use the steel clips to fasten the cover to the frame. In each section use brackets and nails to fasten the frame to ground.

8x12m Storage Tent

V

Spread the wall panel and door panel attach to framework by using the bungee cords clasp the frame to grommets that is construct over the wall panel and door panel to ensure stability. Also use the short pegs to fix the doors to the ground.

Warning

1. In order to avoid rust, oil is covered on the surface of the pipes. Before setting up the tent, please remove the oil carefully to keep the cover clean.
2. Take note that the tent needs to be handled carefully to avoid damage.
3. Do not force the frame as it may be damaged in the process.
4. Tents are meant as temporary shelter and must be evacuated under extreme weather conditions.

Please select a suitable site for the tent to avoid damage to underground sprinkler systems, water, gas or electrical lines.
