## Safety Advice

### Attention

In some countries approval is needed to set up a tent larger than 75 m<sup>2</sup>. It is your responsibility to comply with local rules and regulations and to ensure that the tent is assembled correctly.

In case of bad weather conditions, it is your responsibility to ensure the tent is safely secured and that the tent does not cause damage to others.

Do not use open fire, welding equipment or other sources which can ignite, inside or close to the tent.

The tent must be safely secured. We recommend you secure your tent with straps and pegs as soon as it is assembled.

Make sure to check if the tent is covered by your home contents insurance.

Tents must be evacuated under extreme weather conditions.

In the event of snow, always remove snow from the roof of the tent regularly to prevent snow from building on the roof, as heavy snow can cause the tent to collapse.

In the event of rain, there is a risk of rain puddles building up on top of the roof of the tent. Heavy rain puddles can cause the roof to collapse. It is your responsibility to ensure rain puddles do not build up. As a precaution, make sure the roof of the tent is stretched out properly and adequately over the side frames of the tent and remove rain water regularly.

Do not unpack or repack your tent in freezing temperatures. In case of temperatures below zero, always unpack and repack your tent indoors to avoid the risk of cracking parts.

The tent must be totally dry before you repack and store it to avoid mildew.

**Note:** Dancover warranty applies only to the normal use of the Product, normal wear and tear excepted, in accordance with written use instructions or manual. The warranty does not apply to damage caused by accident, abuse, misuse, or modification of the Product.

## Attention

Please use gloves when assembling the metal frame of this unit. The metal components of this product have been treated, with a rust preventive coating. This coating is not dangerous, but you may grease your hands during assembly. We recommend that you wipe metal parts clean with a mixture of warm water and dish detergent prior to assembly. Should your hands become dirty, simply wash with soap and water.

After the frame is set up, it should look like the picture shown below.

Please assemble the frame in these steps. All sizes have similar assemble step.

**Step 1**

When assembling the tent, make sure that all the wing nuts are attached to the inside.  
Connect one center arch pipe(8) with the extension pipe(11). Attach the corner arch(7) to the ends of the extension pipe(3). Now connect the ceiling rail(6 and 5) with each other using the 1.75" screw and the wing nuts.  
Connect extension pipe (3) and (11) together then attach ceiling rail to extension pipe(3 and 11) through 17 using the 2.5" screws and wing nuts.

**Step 2,**

Repeat step 1 for the next elements and place them on the ground one after another, as illustrated.

**Step 3,**

Now connect the arch elements with each other using the connecting pipes (9 and 10). Note that only corner arch 10 are used for the front segments. Use the 4" screw and wing nut to tighten them.

**Step 4,**

Strengthen the frame with steel wire.

**Step 5,**

Start setting up one side first. Connect the corner arch (7) with the legs (1 and 2). Secure the frame using the connecting pipes (9 and 10). Attach the diagonal pipes (4) to the back legs (1). Please refer to the completed frame pictures to attach the diagonal pipes.

Screw tighten the tent at the feet, using the 4" screws and wing nuts.

Use the floor bracket and the 10x350mm pegs to fasten the frame to the ground.

**Step 6,**

Unfold the tent cover and put it over the frame. Insert the fasten bar (15) into the loop at the lower end of roof and fasten it with steel clips. Attach the end wall to the frame using the bungees. Tension the roof cover to the tent frame to the ground using the 6x180mm pegs.

**Step 7,**  
Assemble the pillar set like on the picture below.

**Step 8,**  
Use the ropes to attach the door and cover to the frame. Find a proper way and strength to attach the cover to the frame carefully. Please do not use too much strength to tear the eyelet out of fabric.
